EDUCATION

University of Waterloo

Candidate for Bachelor of Mathematics in Computational Mathematics

Waterloo, ON

Sept. 2020 – Present

TECHNICAL SKILLS

Languages: Python, Typescript, Javascript, C/C++, Java, R, SQL, Bash, HTML/CSS, Racket, Dart

Technologies: AWS, DynamoDB, Docker, React, React Native, MongoDB, Express.js, Node.js, Redis, Tensorflow

EXPERIENCE

Software Engineer

July – August 2025

Hawala

Toronto, ON

- Built a **REST API** with **AWS API Gateway and Lambda** to integrate the chatbot with **Supabase** and **OpenAI**, ensuring secure and scalable backend communication.
- Optimized customer support workflows, reducing average response time by **67%**, significantly improving user satisfaction and engagement
- Developed a hybrid response engine that uses semantic similarity scoring to determine when to serve predefined FAQ responses versus when to generate context-aware replies via **OpenAI's API**

Software Engineer

Sep 2024 – Dec 2024

Yaqeen Technology Consulting LLC

Toronto, ON

- Developed and maintained a critical **Call Analytics System** for multiple clients, ensuring real-time insights and operational efficiency
- Designed and implemented **AWS Cloud-based** calls scoring solution, leveraging **Lambda microservices, S3, and Python** to process and analyze large volumes of call data
- Led **operations monitoring and compliance initiatives**, ensuring adherence to regulatory requirements and optimizing system performance

Software Developer

Jan 2024 – Apr 2024

RentGo

Toronto, ON

- Enhanced the user authentication system in **NextJS** to use Next Auth with Firebase, to ensure a more secure user access and data protection policy
- Transitioned the mobile application to utilize **Firebase** services such as Firestore, Authentication, and Realtime Database to enable a dynamic and scale-able application with enhanced performance and security

Software Developer

May 2023 – Aug 2023

Kazi Consulting (Specialized Consulting Firm)

Toronto, ON

- Engineered a diverse range of web application templates utilizing **React**, featuring fully functional front-end interfaces, empowering clients to select the optimal solution tailored to their business needs.
- Developed a custom **REST API** tailored to specific needs of business for seamless data standardization across multiple systems and applications

Full Stack Developer

Sept 2022 – Dec 2022

SS&C Technologies

Toronto, ON

- Spearheaded the development of an internal tool to filter and extract key data from a cloud database to automate the data migration process to a more cost-effective alternative, decreasing storage costs by **24%**
- Leveraged **Beautiful Soup** in a custom **Python** application to enable precise extraction of critical data from the company web sources, enabling accurate and efficient data retrieval
- Implemented a multi-threaded program by harnessing the capabilities of various **Python** APIs. Streamlined the application's processing capabilities and achieved an **80%** reduction in runtime

PROJECTS

Typhon | NextJS, Typescript, Firebase, GCP, ArcGIS

Aug 2023 – Present

- Developed a full-stack web application for the **GIS** industry alongside a team of 4 developers to streamline spatial workflows from the ground up
- Implemented tailored plugins for **ArcGIS** to provide a 30% cost efficient data storage system for land mapping companies
